1 Professional Summary

Motivated and detail-oriented Artificial Intelligence Engineer with a strong academic background in AI, machine learning, and deep learning. Proficient in Python, TensorFlow, PyTorch, and data preprocessing, with hands-on experience in building and fine-tuning models for computer vision and natural language processing tasks. Demonstrated ability to apply theoretical knowledge to practical problems through academic projects and personal initiatives. Eager to contribute to innovative AI solutions in a collaborative and fast-paced environment. Quick learner with a passion for continuous growth in the AI and data science domain

2 Skills

- **Programming Languages:** Python, C++, SQL
- **Frameworks & Libraries:** PyTorch, TensorFlow, Hugging Face, LangChain, Langgraph, FastAPI, React
- **AI/ML Concepts & Tools:** Transformers, LLMs, Prompt Engineering, Fine-tuning, RAG, Ollama, Supabase, Chroma, Qdrant
- **DevOps & Deployment:** Docker, Kubernetes, Git, CI/CD, MLOps
- **Cloud Platforms:** AWS
- **Other Skills:** Algorithms, Data Structures, NLP, Distributed Systems, Classical ML

3 Professional Experience

AI Intern

Islamabad

KSOFT

JANUARY 2025 – MAY 2025

- Designed and implemented an AI-powered **Medical Transcription System** integrating Whisper, LLaMA 3.2, and prompt-engineered modular pipelines, enabling automated, high-accuracy conversion of doctor-patient audio consultations into structured clinical notes.
- Integrated OpenAI's Whisper for speech-to-text processing, achieving high transcription fidelity across diverse medical conversations.
- Employed locally hosted LLMs via Ollama to ensure data privacy and offline functionality, reducing cloud dependency and improving system reliability.
- Engineered prompt workflows for structured note generation using LLMs, streamlining clinical documentation and reducing manual effort for healthcare professionals.

4 Projects

SmartSurfAI

FEB 2025 – Present

- Designed and implemented SmartSurfAI, an AI-powered web agent platform integrating LangGraph, Playwright, and multi-LLM orchestration, enabling autonomous browsing and task automation across dynamic web environments.

- Developed autonomous agents using LangGraph for robust state management and adaptive workflows tailored to diverse browsing tasks and user intents.
- Integrated Playwright for headless browser automation with custom element detection and interaction logic, enabling precise content scraping and web manipulation.

ChatCafe

APRIL 2025 – JUNE 2025

- Designed and developed an AI-powered customer service chatbot for a coffee shop app, using Python-based agents and LLMs.
- Built a modular agent system with Guard, Order, Details and Recommendation Agents to manage safety, ordering, menu info, and suggestions.
- Integrated chain-of-thought prompting for order processing and RAG for real-time menu detail retrieval.

5 Education

Bachelor of Science in Artificial Intelligence

Islamabad

Shaheed Zulfiqar Ali Bhutto Institute of Science and Technology (SZABIST)

MM/YYYY – MM/YYYY

- GPA: 3.48/4.0
- Relevant Coursework: Machine Learning, Deep Learning, NLP, CV, Reinforcement Learning, Data Structures, Artificial Intelligence, Cloud Computing

6 Freelance AI Projects & Publications

- Physiotherapy Video Organizer (MS FYP)
 - Developed a video organization tool to categorize and retrieve physiotherapy exercise videos based on body part, condition, and therapy type.
- Application of Efficient and Interpretable Convolutional Vision Transformers for the Classification of Infectious Diseases in Chest Radiological (MS Thesis)
